Japan Fuji International Is a professional provider of high quality elevators. To produce high quality elevators, we abide by the philosophies of, "Technical Leadership, Excellent Quality, and Service First."

Our product line encompasses various typed of elevators, including Home elevators, Passenger elevators, Observation elevators, Hospital elevators, Car elevators, Parking facilities and more. All of our products are the culmination of craftsmanship, technology, and aesthetics.

Vision / Principles / Mission

- **Vision**-The most Reliable vertical transportation provider
- **Principles**-Quality Service Teamwork Innovation
- **Mission**-To Satisfy our customers with all-in-one solution

AN ELEVATOR INNOVATOR

ABOUT US

Positioning

Base on the spiritual of craftsmanship of Japan, we keep pursuing excellence and success in order to provide the best quality elevators to the world.

Integrity is our most valuable assets.

It leads us to remain the position of the most reliable, remarkable and innovative elevator provider.

For realizing the best partnership, we insist on the guidance of a moral compass that ensures transparency, fairness and respect for all of our shareholders.

Business operation policy

Chasing better tomorrow

The continuous innovation for better safety and quality is the power to push our company go further, We will based on the the prinical of “always have the better solution” and “expertise is our pro and quality is our honor” to get the best result on quality, efficiency and delivery schedule,

Trust from customers

Trust is most important when we deal with our customers, we always treat customers as our family, based on this spirit then we can make better product to meet our customer’s daily request, and not only to win the trust from customers but also win the trust from all of the shareholder and employee of JFI,

Create profit

Profit is the must for company to survive, but also care about customer’s profit, since only our customer win the profit then company can get the same, and after company win the profit then it can share the profit with shareholder and employee, therefore all of the staff of JFI shall work together to get the company profit in order to share the profit together,

International Scale Manufacturer Facilities

Our philosophy is being serious, professional, committed, and insistent as we pursue the highest Durable of manufacture in the World.

The safety and comfort of our elevators is our primary concern. Pursuit of quality is a shared goal for all of our employees. In terms of hardware, we insist on the use of AMADA equipment, supplemented with computerbased production and a stringent quality system.

Complete set of service system.

Backed with the first-class technologies, rich management experiences and superior service, elevator provides scientifically maintain and strict quality control for the users of our products. Choosing elevator is same as selecting a complete set of service system.

Observation Lift

NEW TECHNOLOGY

NEW SOLUTION

NEW AGE[®]

ELEGANT REINFORCED
ALUMINIUM ALLOY SHAFT

The Benefit of Aluminium Alloy Shaft :

1. No need to add the concrete shaft structure. It saves you a lot of cost.
2. Easy and quick installation for new and old house. It does not interfere with your household life.
3. Little space is required for installation. Only 2.25m² is enough for installation.
4. It can be carried away when moving to a new house.
5. Unlike common sheet steel. The exterior aluminium alloy cladding looks elegant and decent. It can easily match with original upholstery.
6. It can become observation home lift by changing the exterior aluminium alloy cladding into glass to show your dignity.

PERFECT QUALITY WITH NO ANY COMPROMISE

Faced with rapid changes in the market, we stay on top of market trends and seek innovation and progress at all times. We aim to provide clients with the most suitable products through our professional perspective. Looking towards the future, we will continue to develop high quality, comprehensive elevators that fulfil both intuitive and technological demands. Not only will we provide customers with comfortable living spaces, we will progress towards our goal of becoming the "World's No.1 Elevator Company"

ETOUCH-090-OUT EHLC-05

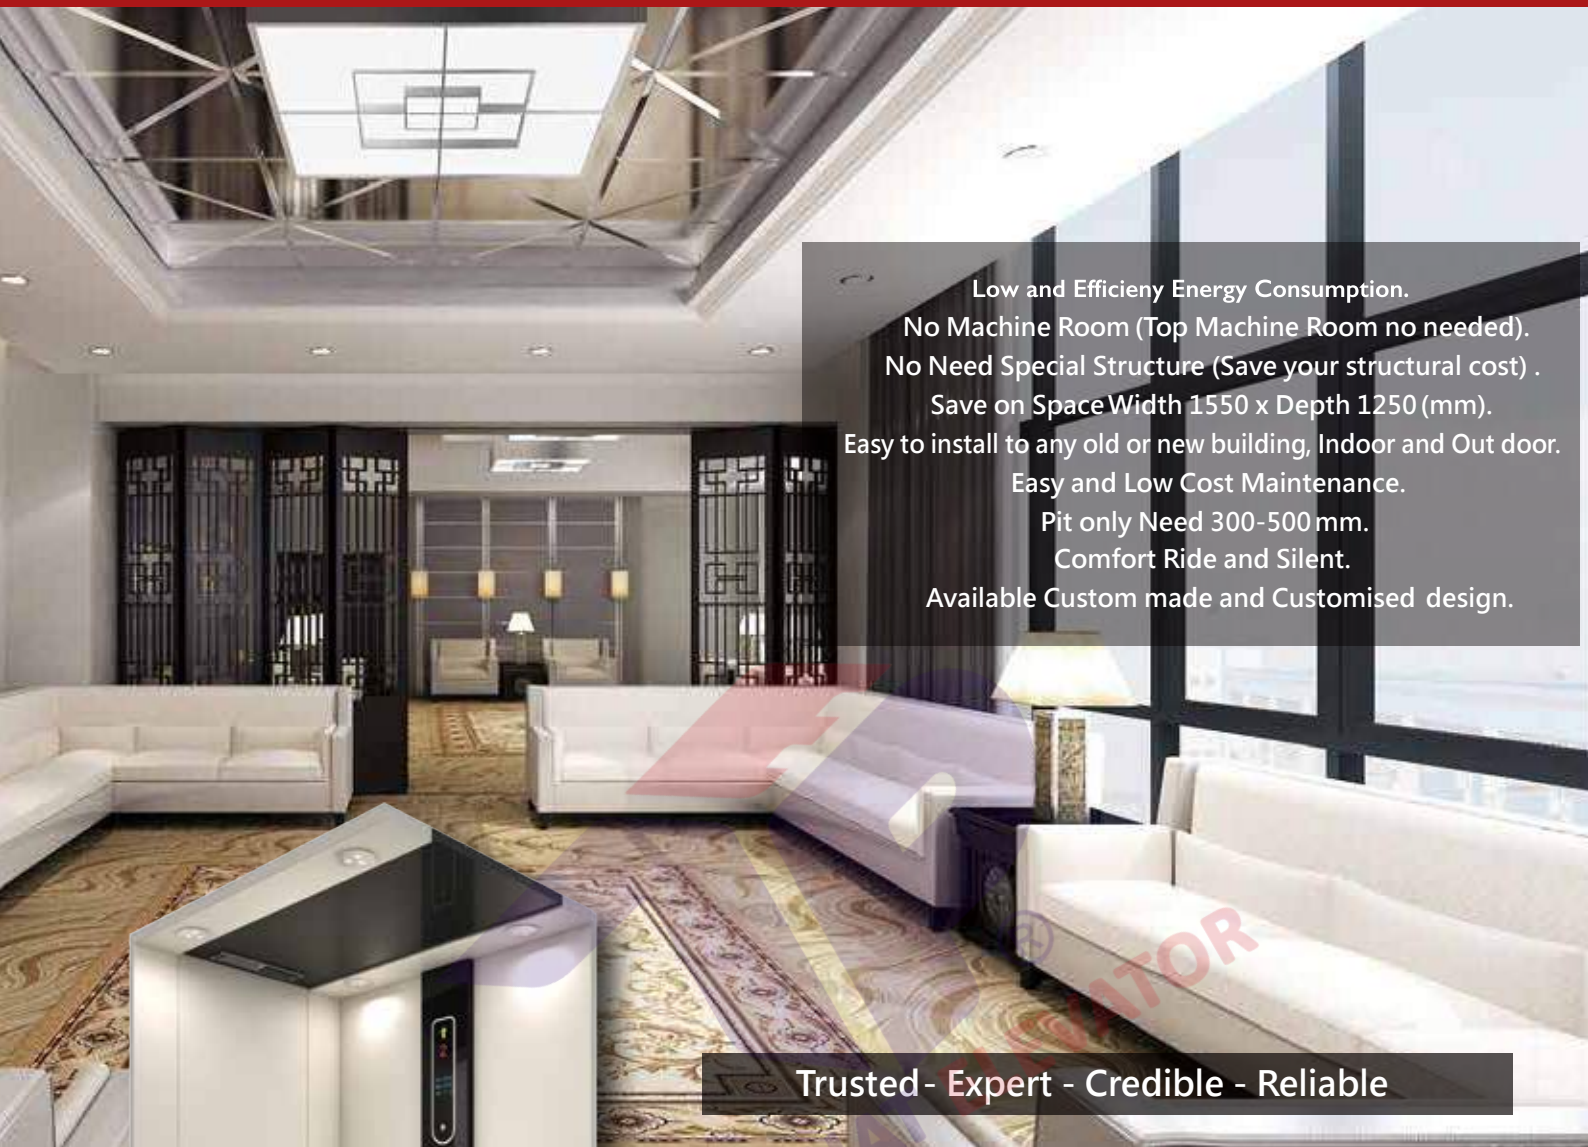

EHCL-104E

ESIM-07

Home Lift

Low and Efficiency Energy Consumption.
No Machine Room (Top Machine Room no needed).
No Need Special Structure (Save your structural cost) .
Save on Space Width 1550 x Depth 1250 (mm).
Easy to install to any old or new building, Indoor and Out door.
Easy and Low Cost Maintenance.
Pit only Need 300-500 mm.
Comfort Ride and Silent.
Available Custom made and Customised design.

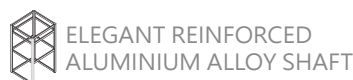

Trusted - Expert - Credible - Reliable

Luxury & Premium Quality
